

Sustainable Energy & Housing

Why Build using a Sustainable Build System?

- SEH has developed a fast and efficient building system that provides the latest in energy efficient living.
- More cost effective construction techniques over all other traditional building methods.
- Architectural solutions where net zero energy consumption is one of the main priorities.
- Reproduce any design to bring your ideal project to life using modern building technology.

These sustainable homes are now available on the Costa del Sol as a bespoke service.

Building Comparisons:

<u>Comparison chart</u>	SEH build	Contemporary builds	Traditional builds
Build time	6 months	12 months	12 months +
Energy rating	A guaranteed	C - D	D - E
Finish	Standardised high spec	Varied	Varied
Ongoing utility costs	Low	Medium	High

The construction process is split into 2 smaller projects that are developed in parallel. Manufactured off-site and erected on site.

Self-build homes available from The Marbella Connection – a bespoke home design service that allows you to plan your own home.

Choose from a number of locations along the Costa del Sol.
